

Tuesday

MATHS WEEK 7

Year 1

Maths Support- Introducing coins and finding amounts

Year 1

Week four: 19/05/2020

Friday - I can explain how much the items cost

Why?

Now that we have developed confidence in understanding which coin is which and the differences we can now progress. This week we will look more at finding amounts using the correct coins.

Key questions

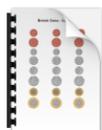

Can my child find the amount of two coins?

Can my child work out what they can buy with a certain amount (with assistance)?

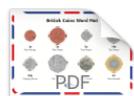

Language to be used

Use the correct terms for the coins. For example one pence or 1p. If you talk about £1 or £2 coins remember to remind your children they are not called 100 and 200p.

Begin with - How?

Fairyland Menu

Cake..... 40 p

Apple..... 20 p

Role play being at the Fairyland café with a family member, taking on the role of the customer and the waiter/waitress. If you want you can make up your own shop at home for a bit of fun.

- Customer selects two items
- Waiter/waitress needs to add the amounts together.
- Swap roles.

Have a go with the cake and apple.

Complete the task below

Fairyland Menu

	Cake.....	5p
	Apple.....	2p
	Sandwich.....	5p
	Chocolate biscuit.....	1p
	Orange juice.....	10p
	Banana.....	2p
	Milk.....	50p

Have a go role playing with your child swapping roles of the customer and waiter/waitress. Choose two items at a time only. The waiter/waitress will need to add the amount together. Use real coins if possible and the exact amount.

★ ★ Complete the task below

Fairyland Menu

Cake..... 40 p

Apple..... 20 p

Sandwich..... 50 p

Chocolate biscuit..... 10 p

Orange juice..... 30 p

Banana..... 30 p

Milk..... 40 p

Have a go role playing with your child swapping roles of the customer and waiter/waitress. Choose between two and three items at a time only. The waiter/waitress will need to add the amount together. Use real coins if possible and the exact amount. Try adding new things to your stall from around the house.

If you had £2 to spend, what could you buy?

 Complete the task below

Firstly create your own pricing strategy for your stall menu. Alternatively make your own completely from items around the house. Adults help the children to choose prices that will challenge them appropriately. Let them price the items anything up to £2.

Have a go role playing with your child swapping roles of the customer and waiter/waitress. Choose between two and three items at a time only. The waiter/waitress will need to add the amount together. Use real coins if possible and the exact amount.

If you had £5 to spend, what could you buy?
